CASEFORGE SOLUTION BENEFITS

✓ Browser-based. Look-and-feel are much more "mobile-device" flavored for ease of use and training.

✓ Stations can be used with Windows or "free" OS with browser.

✓ The application server can be hosted with Windows or a "free" OS.

✓ Designed to be "virtualization" and "container" friendly.

✓ Mobile station flexibility is increased.

✓ Connection to point-of-production scales and printers via a network allows for shared resources, scalability, rapid hot-swapping, and roving stations.

✓ Increased ability to administer and share printers and scales across all stations.

✓ Added Multi-Palletizer ability.

✓ Software updates are quick and centralized.

✓ Can be installed on-premise or centrally, depending on your network and infrastructure

requirements.
- ✓ Greatly increased flexibility to filter, and assign orders and items.
- ✓ Greatly increased ability to create more complex inventory scenarios.
- ✓ Remote administration capabilities.
- ✓ Increased use of BarTender embedded features and functionality.
- ✓ Increased functionality to integrate various inbound and outbound data sources.
- ✓ Designed with hooks for QA and BI applications systems.
- ✓ Can be integrated with any ERP system via our CTL (Coolearth Translation Layer - a robust middle layer application for sharing data between systems.)
- ✓ Comes with a stand-alone Item/Customer/Order entry system for non-integration installations (or as an interim to integration).
- ✓ Highly customizable label content. Pull in any data from your orders, item master or any other source you can reach.
